# Steven Davis, PE

## Senior Consultant

Mr. Davis has more than 24 years of experience in the construction industry. He has represented owners and contractors on major construction projects in the capacity of project manager, project engineer, cost and scheduling engineer, and claims analysis. His particular area of expertise is contract administration and analysis of construction delay and productivity claims. He utilizes his engineering background and practical experience to provide analysis, negotiations, and testimony on behalf of clients and has testified as an expert witness in the areas of schedule analysis, productivity analysis, and damages. The range of his experience includes analyses of claims on numerous project types including: healthcare facilities; buildings including hospitality, commercial/entertainment, and educational; highways and tunnels; ports; railways and transit; water supply and wastewater treatment facilities, as well as seismic and forensic services.
